

Skylines

It's Official! The Club members unanimously approved the recommendation of the Board of Directors on April 18 to relocate to the New Market Airport as our primary site of operations. The majority of our current membership has now visited the site at least once, and without exception are enthusiastic about the site.

Thanks to a unique dolly engineered by Charlie Lee, we now have the 2-33 in a hangar (along with the towplane). A similar dolly will be constructed to permit storing the K-21 in a hangar.

Member News

James Postma's expected departure has come to pass. He's leaving the area no later than May 21, 1992, so we need to elect a new President. We'll miss James' leadership; he was and is a major driving force that led *Skyline* into creation! At the April 18 meeting, Spencer Annear was nominated to complete James Postma's term. The election will be at the next meeting; if you have additional nominations, call Jim Kellett.

Bob Leyendecker resigned his post as Vice President, and asked Shane Neitzey to serve as Acting Vice President. At the April 18 meeting, the members ratified Bob's selection by electing Shane Vice President to complete Bob's term. Bill Vickland returned April 18 from a stint in Moscow, helping the US distribution of humanitarian assets there. There's a chance that he may return for a longer stint later in the summer...maybe he'll get to fly some of the neat sailplanes now coming out of the former-communist bloc!

Phil Jordan has donated the artwork and layout services for *Skylines*. Check out the neat logo!! It's based on one designed for the Warrenton Soaring Center, but never used. What's coming? How about patches, T-Shirts, letterhead stationery....wow! We all say "Thanks", Phil!!

Dues News

Several of our members – you know who you are!! – are significantly in arrears on dues. This won't do, happy campers!! **your** club needs the money to keep **your** equipment in operation for **you**. It's not fair to slough off this obligation and commitment on your fellow members. So fess up and **send money** to:

Bela Gogos, Treasurer, Skyline Soaring Club, 16073 Simon Kenton Road, Haymarket, VA 22069
Don't know if you're in arrears? Call Bela at (703) 754-2610.

Maintenance News

During maintenance of the towplane, extensive rust damage was discovered in the rudder and horizontal stabilizers. Maintenance Officer Jim Miles with a crew of volunteers has removed the plane's tail feathers, and we write they are being evaluated by an experienced welder to determine their reparability. As a consequence, there will be **No Flying** April 25-26, and it's uncertain as to when the towplane will be back in service. In the interim, the Maintenance Officer will alert the cognizant Duty Officer as to when the ship will

return to duty. *If you want to keep up on this, call the next Duty Officer in line on the schedule!* This way we can avoid a complicated telephone tree to apprise the members of when operations will resume.

Personal Data

Enclosed is the first "phonebook" of the Club. The information available on many members is *Very Scanty*... please review this, and provide additions and corrections to Jim Kellett, (703) 378-4765. We'll provide a revised version about the end of the year.

Scheduling, Etc.

At the last meeting, there was an extensive discussion of how to assure that our operations are adequately staffed by members. The clear consensus of the members were that we should continue developing and issuing a "mandatory" list of duty officers of all non-instructor/non-towpilot members.

- If a member has a personal conflict with the schedule, he/she should on his/her own initiative swap with another member.

- If it's not clear if the weather will facilitate soaring, he/she should plan on devoting that day to the Club anyway. That's because (a) often the weather is unpredictable and different at New Market, and (b) there's *always* work to be done! Our Maintenance Officer will develop a list of "things to do" to be left at the airport so that, if we can't fly, we can enjoy each other's company while we work on our assets.

Next Meeting

The next meeting represents a *Big Change*...we're going to hold it at the airport itself, to commence "after the flying" on Saturday, May 30, 1992. We'll have a do-it-yourself picnic to transition between work and meeting, so bring something to eat (and something to share).
